

Michael Conor Kushman

AI-NATIVE PRODUCT BUILDER · ARTIST WHO BUILDS SOFTWARE

White Plains, NY · Open to relocation (tri-state area)

michael.kushman@gmail.com

kushman.work · github.com/never-nude

Mixed-media artist who now builds complete software products. For twenty years the materials were paint, plaster, charcoal, and welded steel; software is the newest one. I turn ideas into finished, shipped apps end-to-end — **3D web, data visualization, native macOS, games, and civic AI** — mostly solo, using AI-assisted development plus product vision, UX, and systems design. The questions are the same as they always were: form, composition, space.

SELECTED SOFTWARE

Worldbook

worldbook.earth

Interactive 3D atlas — 239 countries shaded live across dozens of data layers, with migration and refugee flows drawn as moving currents and a time scrubber to watch the world change.

THREE.JS · WEBGL · DATA VISUALIZATION · SOURCED DATASETS

Atrium

atrium.earth

A museum for sculpture in the browser — rooms you move through, with large 3D scans streamed progressively so the space stays fast. 363 works, antiquity to the modern era.

THREE.JS · WEBGL · ASTRO · DATA PIPELINE

Ad Arma — The War Council

ad-arma.com

A turn-based strategy wargame on a hex grid: original ruleset, custom engine, hidden-information "war council," and online multiplayer. I designed the rules and built every line.

GAME DESIGN · SYSTEMS DESIGN · JAVASCRIPT · REAL-TIME MULTIPLAYER

ThreadKeep

macOS · public beta

A native macOS app that turns iMessage history into a searchable, local-first archive — built directly on Apple's undocumented message database. Private by default.

SWIFT · SWIFTUI · LOCAL-FIRST · PLATFORM CRAFT

WPCNA

wp-cna.org

Civic infrastructure for a White Plains neighborhood council, in production. Residents submit notices; an AI pipeline triages them for human review — a person always makes the call. "Ask White Plains" answers questions from the site's own content.

CIVIC TECH · AI-ASSISTED WORKFLOW · STATIC SITE

Treefort

treefort.lol

A private "clubhouse" network — forts you knock to enter, each with a wall, a paint room, and a gif machine. No accounts, no feeds, no analytics; the whole thing runs on a single Cloudflare Worker with zero dependencies.

CLOUDFLARE WORKERS · D1 + R2 · ZERO DEPENDENCIES

EXPERIENCE

Independent Product Builder

2023 – Present

Self-directed

Design and ship complete software products end-to-end using AI-assisted development — the six above and counting. From first idea to live URL: product, interface, systems, and deploy.

Mixed-Media Artist & Sculptor

~20 years

Independent · kushman.work

Painting, murals, charcoal and pastel, plaster, and welded / plasma-cut steel. A working practice in form, composition, and space that now drives the software.

SKILLS

Product: vision, UX, systems design, rapid prototyping, 0→1 shipping

AI-native dev: AI-assisted build workflows, spec-to-product

Web: JavaScript / TypeScript, React, Node, Three.js / WebGL, Astro

Native: Swift, SwiftUI (macOS)

Backend / infra: Python, Cloudflare Workers, D1, R2

Craft: visual & interaction design; 20 yrs mixed-media art

EDUCATION & BACKGROUND

Connecticut College — B.A., 2008

Selected background: earthquake relief in Haiti · teaching in West Africa · furniture fabrication in Ulster County, NY · painting and sculpture throughout.
